molex

Temp-Flex Intermittently Bonded Flat-Ribbon Cables deliver increased flexibility, 180-degree cable rotation at discrete sections and organized wire placement, while enabling automated or semi-automated termination, saving manufacturing time and reducing error

Features and Advantages

Increased flexibility, organized wire placement and 180-degree cable rotation at discrete sections

Supports cable routing around components and in tight spaces

Supports automated or semiautomated termination

Enables mass production. Reduces termination error. Improves termination efficiency

Enables termination at each conductor instead of IDC termination

The discrete wires can be terminated at different places within the system. They do not all have to be terminated in one location, providing design flexibility
